PROJECTS

Zerodha Clone — Full-Stack Stock Trading Platform

React.js, Node.js, Express.js, MongoDB Atlas, Bootstrap | [GitHub Repository](#)

- Built a responsive full-stack stock trading platform with reusable React components and client-side routing for a seamless multi-page user experience.
- Designed and implemented RESTful APIs in Node.js/Express.js to handle user interactions and application data flow between client and server.
- Implemented full CRUD functionality with MongoDB Atlas and structured database queries for efficient data retrieval and updates.
- Followed a modular, maintainable project architecture and used Git/GitHub for version control throughout development.
- Applied responsive design principles with HTML5, CSS3, and Bootstrap to ensure consistent usability across screen sizes.
